Mr. Reber noted that:

a. Sidney Buford of State [] looked over the G-2 files while there. These files are to be preserved as well as other staff files. In view of this fact, it appears that it will not be necessary for ORR and OCD to send a microfilming team for the purpose of making a permanent record of these files.

b. He had discussed with [] and Dr. [] suggestion that ONE invite OCI to appoint a liaison officer between these two offices. Mr. [] stated that in addition to an ONE representative sitting with OCI's Publication Board, there was also an individual from ONE who attended pre-Watch Committee Meetings. In further discussing this matter, Mr. [] noted that it was his opinion that CIA should have one voice of authority regarding estimates produced by the Agency to include comments made by OCI in the DIB. He noted that in some instances this responsibility could well be that of the OCI.
